Azure Infra & Entra ID

Süd-Deutschland Meetup

Kickoff 16.06.2026 16 – 18 Uhr

Hosts: Alexander Ortha, Andreas Hartig, Klaus Bierschenk

Agenda Layout

Zeit	Thema	Speaker
16:00	Welcome & Vision: Warum Süd-Deutschland?	Alle
16:20	Speaker Vorstellung & Community Insights	A. Hartig, K. Bierschenk, A. Ortha
16:45	Themen-Slot 1: Azure Infrastructure Updates	Placeholder
17:15	Themen-Slot 2: Microsoft Entra ID Highlights	Placeholder
17:45	Q&A, Feedback & Networking	Community

Herzlich Willkommen bei unserem Kickoff Meeting

Meetup Host Alexander

Alexander Ortha

Bridging Datacenter & Cloud | Hybrid Cloud Architect

Ich unterstütze Unternehmen zuverlässig bei der Modernisierung bestehender Systeme und ermögliche ihnen, von meiner mehr als 26-jährigen Erfahrung bei einem weltweit führenden Cloud- und Softwareanbieter zu profitieren. Meine langjährige Erfahrung im Rechenzentrum sowie umfassendes Wissen über Cloud-Technologien prägen meine Vorgehensweise. Daher ist die hybride & souveräne Cloud ein zentraler Bestandteil meiner DNA. Mir ist wichtig, komplexe Themen greifbar zu machen. Ich übersetze Technik in klare Entscheidungen, damit Sie nicht im Fachjargon untergehen.

Meetup Host Klaus

Klaus Bierschenk

Microsoft MVP | Passion for Microsoft Entra ID & Identity

I'm a Microsoft Security MVP and currently working as a Technology Consultant at CGI in Germany, specializing in identity and security topics with Microsoft technologies.

From time to time, I also contribute as an author to various publications and engage in other journalistic activities. You can find more details on my private tech blog (hosted here on GitHub Pages): nothingbutcloud.net

Meetup Host Andreas

Andreas Hartig

Microsoft MVP | Windows Server | Azure Hybrid & Migration

Nach über 20 Jahren Infrastruktur- und Betriebsverantwortung bin ich in die Beratung gewechselt. Bei CGI unterstütze ich Kunden als RCDA-Trainer, technischer Projektleiter, Architekt und Reviewer.
Meine Schwerpunkte liegen in moderner IT-Architektur, Cloud-Transformation, Anwendungsmodernisierung, Infrastruktur und Microsoft-Themen – mit technischem Tiefgang und lösungsorientiertem Mindset.

Welcome & Vision: Warum Süddeutschland?

Wir sind vor Ort, wo wir leben und arbeiten

Community Fokus

Austausch zwischen Azure und Entra ID Enthusiasten, Experten und Community-Mitgliedern im süddeutschen Raum.

Regionale Präsenz

Meetups vor Ort, nahe an Unternehmen, Hochschulen und lokalen IT-Teams.

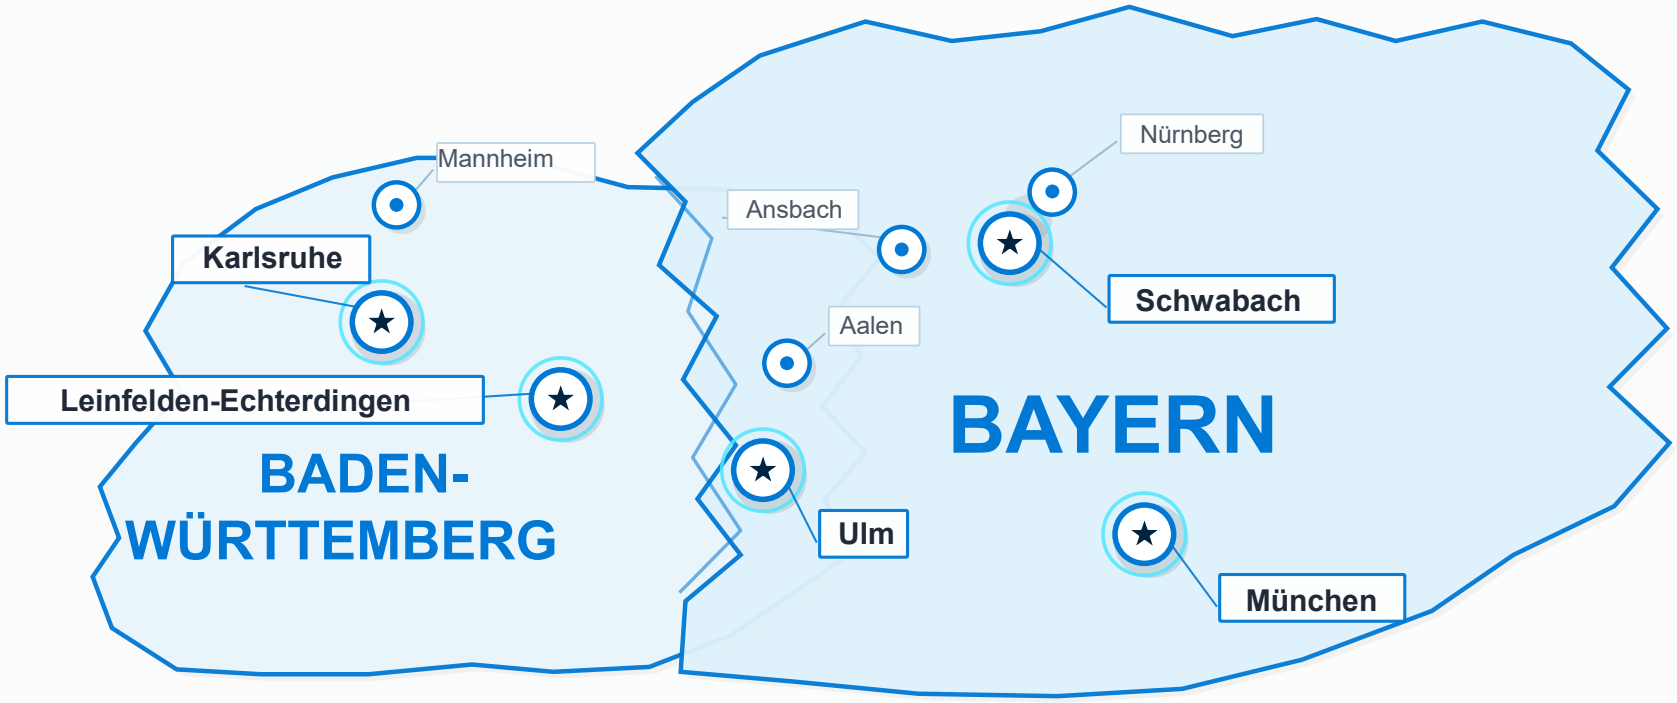

Themen-Tandem

Cloud-Infrastruktur trifft modernes Identity- und Security-Management.

Meetup Fokus & CGI Standorte

Süddeutschland · Baden-Württemberg & Bayern

Azure Infra & Entra ID
SÜDDEUTSCHLAND

Legende

- CGI Standort
- Fokusstandort

CGI in BW/Bayern

Aalen · Ansbach · Karlsruhe
Leinfelden-Echterdingen
Mannheim · München
Nürnberg

Fokusstandorte

Karlsruhe · Leinfelden-Echterdingen · Schwabach
Ulm · München

Süddeutschland

Wohin geht die Reise?

"Wir bringen die Cloud dorthin, wo ihr seid."

Microsoft Sovereign Cloud

Most comprehensive set of sovereignty solutions across AI, productivity, security and cloud platform

Sovereign Public Cloud

Data stays in Europe, under European law

Operations and access controlled by European personnel

AI model choice and AI processing that stays in Europe

Sovereign Private Cloud

Continuous operations across hybrid or disconnected environments

Integrated cloud and productivity with Microsoft 365 Local

AI capabilities and advanced GPU support with Azure Local

National Partner Clouds

Access in-country expertise and nationally owned organizations

Germany: Delos Cloud designed to meet BSI Cloud requirements

France: Bleu designed to meet SecNumCloud requirements

Consistent infrastructure management and development platform

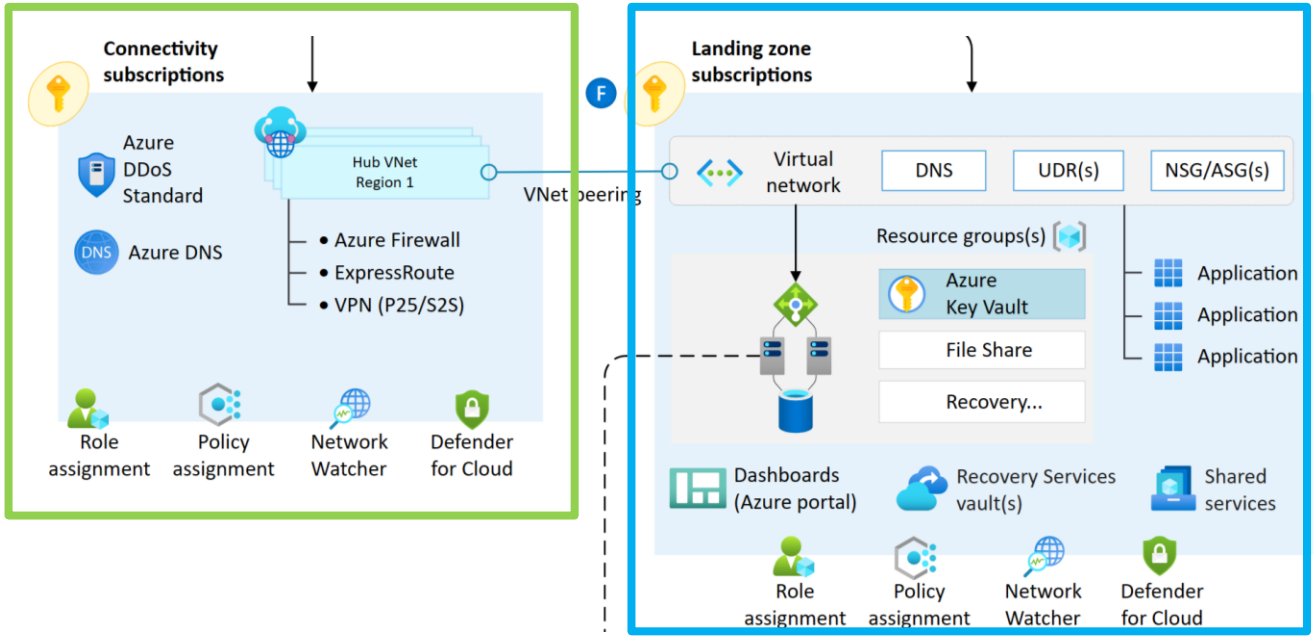

What is an Azure Landing Zone (ALZ)?

- ALZ = dedicated subscription + (VNet) + RBAC + other services + workloads

- ALZ is Microsoft's recommended architectural approach
- Supports Azure environment for scale, security, governance, networking, and identity using **separated subscriptions as containers**
- Subscription = scale unit ➔ more workloads = more subscriptions (better to have too many subscriptions than too few)

Platform Landing Zone:
Shared services, like central network resources managed by central network team

Application Landing Zone:
Workload/app resources in dedicated subscription managed by app team

What is an Azure landing zone? - Cloud Adoption Framework | Microsoft Learn

Azure landing zones

- Set up Azure environments for scale, security, governance, networking, and identity

- Enable **migrations** and **net new apps**
- Consider **all platform resources**
- **Don't differentiate** between **IaaS** or **PaaS**

Sovereign Landing Zones

Regulatory compliance:

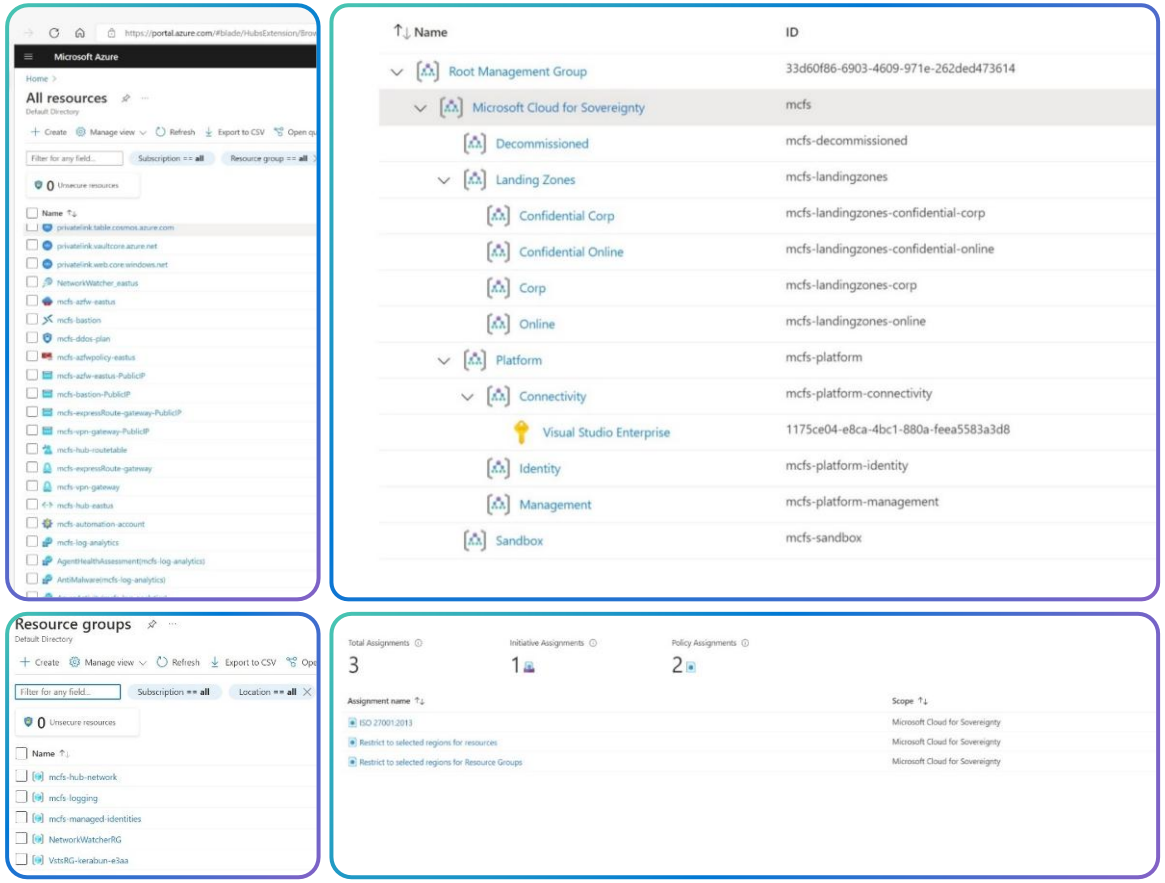

- Align with regulatory compliance requirements using Azure-native tools
- Enforces consistent management, policy, and naming schemas for a reliable deployment environment

Operational efficiency:

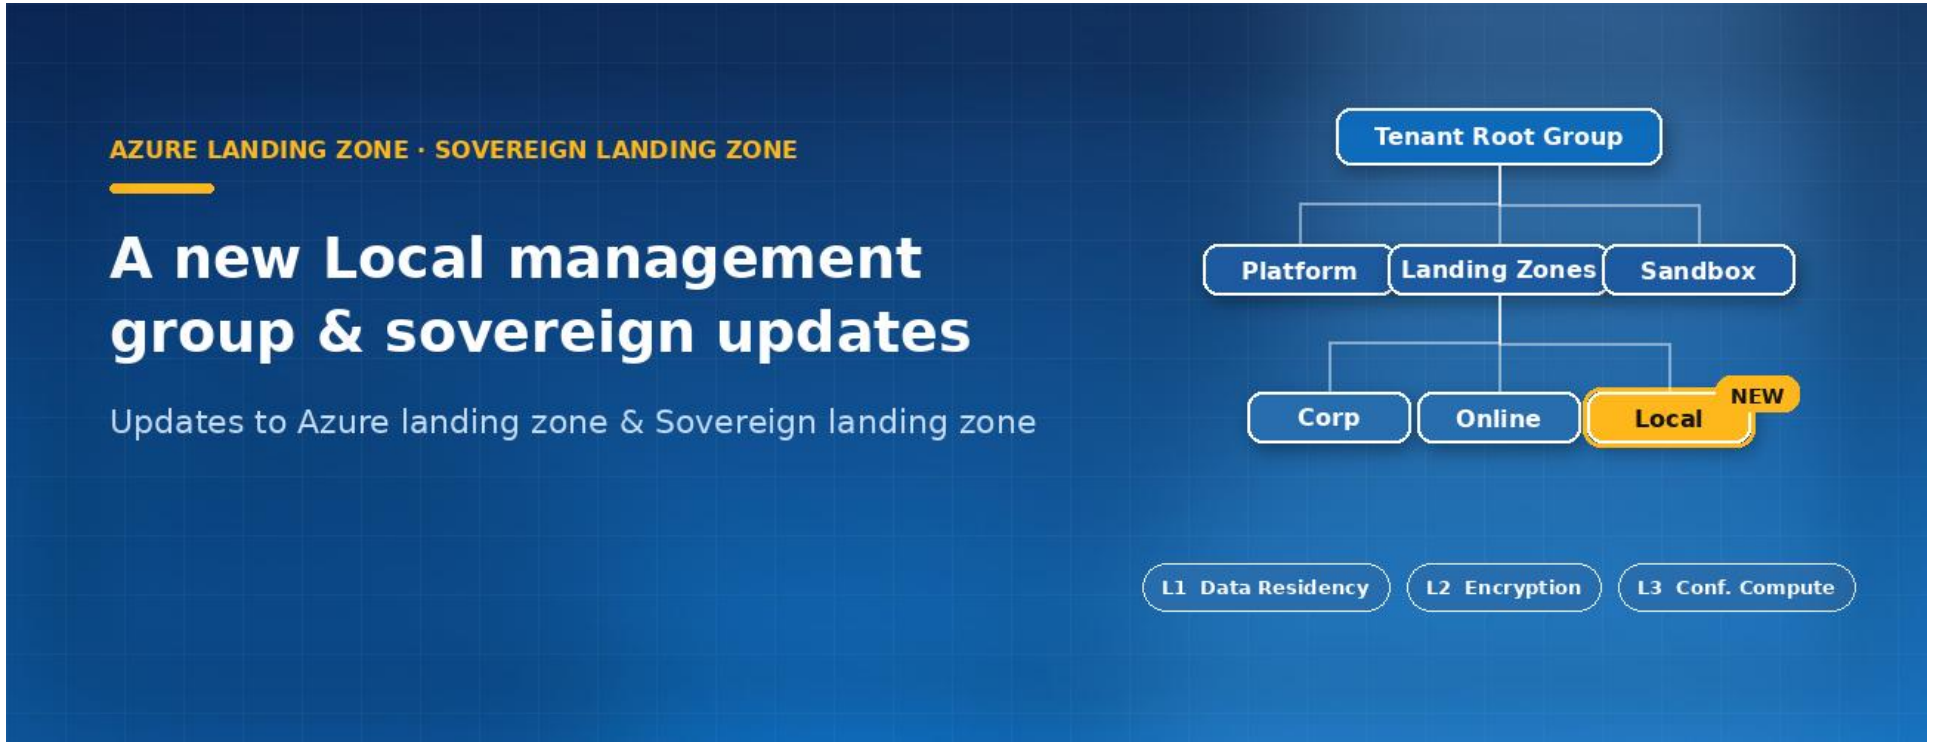

- Easily configurable and deployable with a single script
- Leverages automation for smooth setup
- Follows the Cloud Adoption Framework for easy integration

Sovereign Landing Zones are **now available** in all 15 EU/EFTA cloud regions

Single Control Plane – On Premise with Azure Arc

Für Security- und Identity-Themen

Single Control Plane – Das erste Mal auf einen Blick

- Microsoft hat auf dem Windows Server Summit 2026 die Vision zum “Single Control Plane” visualisiert
- Windows Admin Center vMode
- Azure Policies ersetzen GPOs
- Entra ID Hybrid Join mit “Entra Private Access & Internet Access”
- LAPS Management über Azure Policies & Entra ID

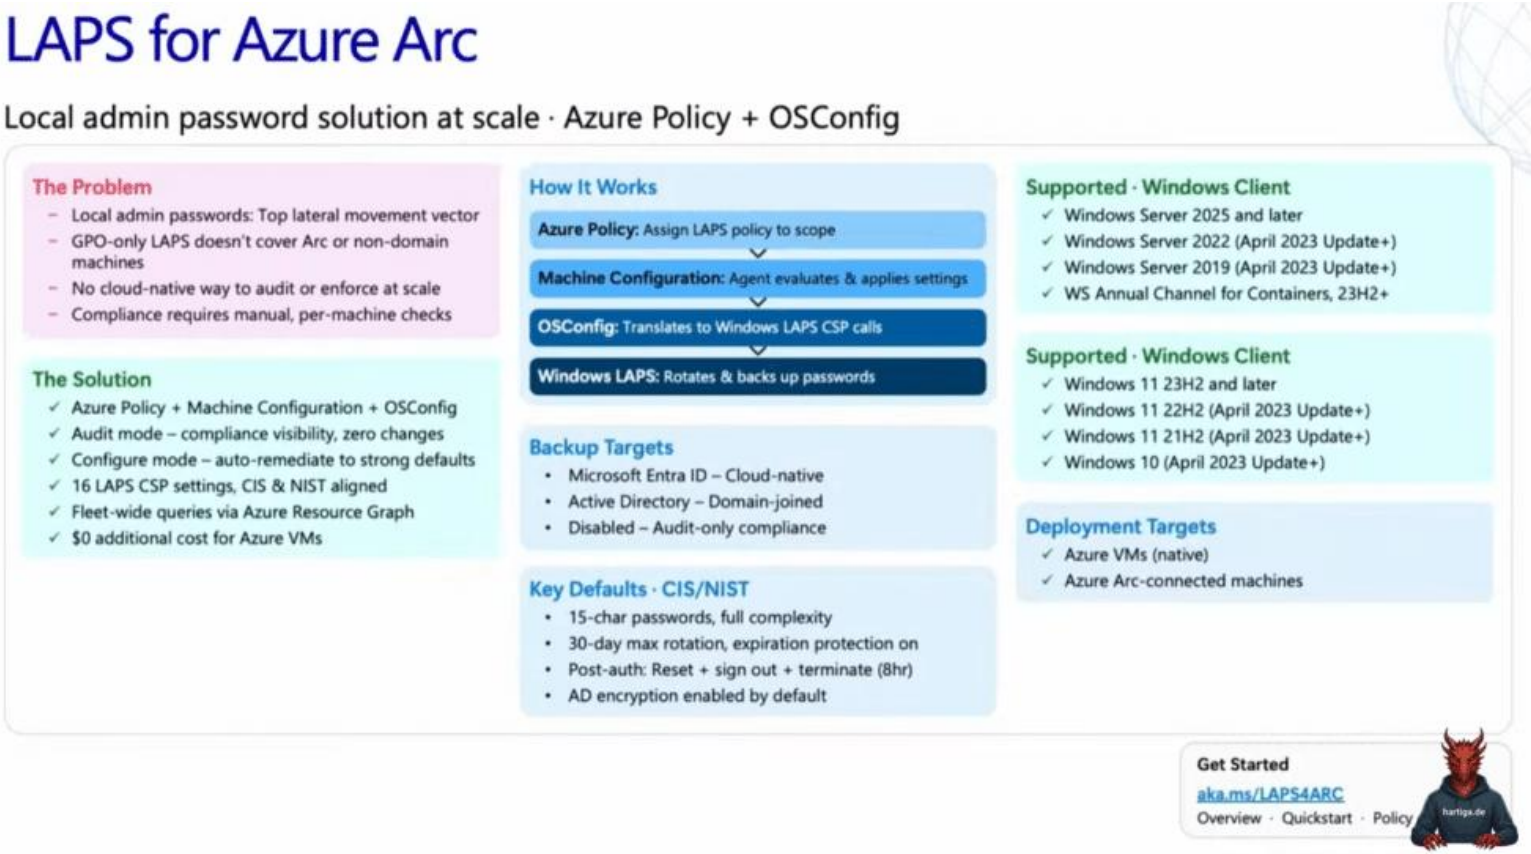

- Global Secure Access Strategy
- Governance & Permission Management

Windows Server Summit 2026 - **Evolving server management: priorities, roadmap, and tooling**

Neuigkeiten für Azure Arc – LAPS for Azure Arc

Vom Windows Server Summit 2026 “Security baselines, benchmarks, posture, and scale” ab ca Minute 16:30

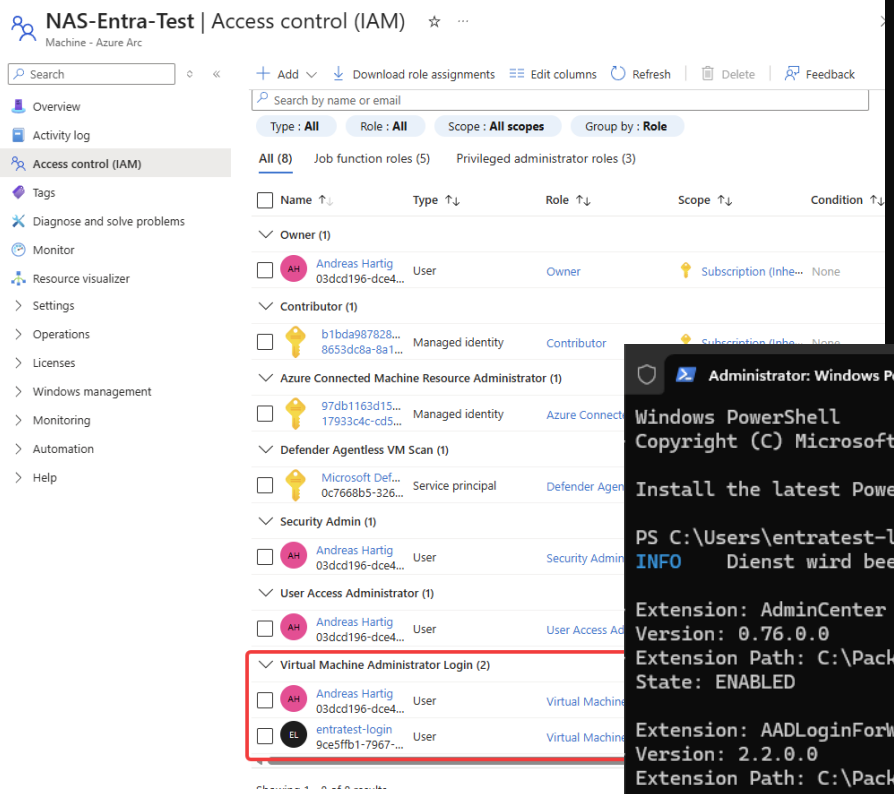

- LAPS for Azure Arc enabled machines
- Cloud Native Passwort Backup
- Neue Azure LAPS Policy
- Azure Policies statt GPOs
- Passwort Rotation
- Windows Server 2019 bis 2025
- Single Control Plane for LAPS

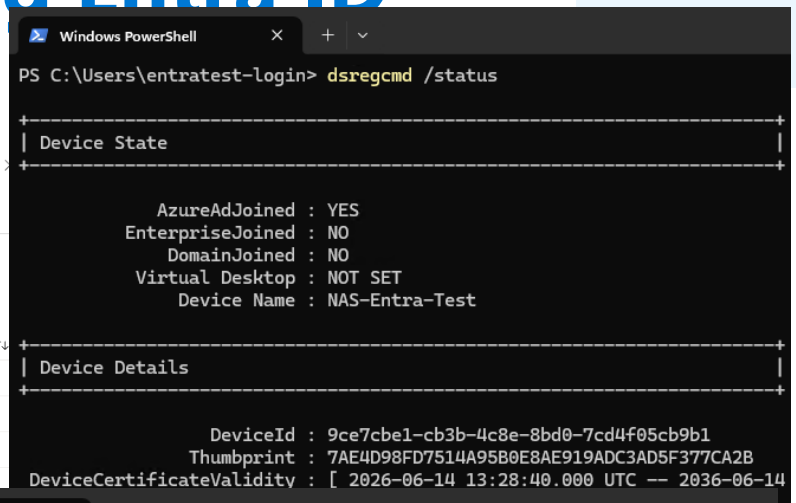

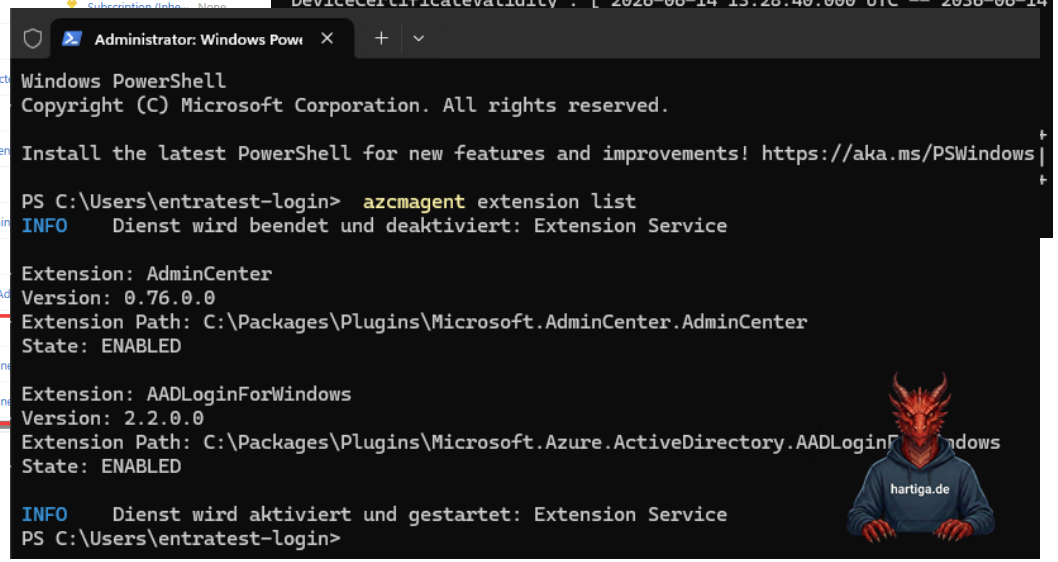

https://aka.ms/LAPS4ARC - Windows Server Summit 2026 "Security baselines, benchmarks, posture, and scale"

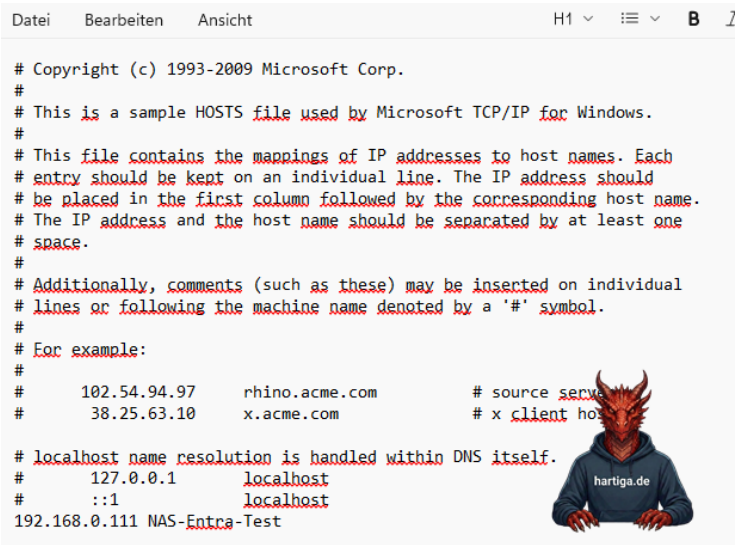

Neuigkeiten für Azure Arc – Sign in using Entra ID

- Enforce MFA for Windows Server
- No requirement for Active Directory
- Use existing Entra ID credentials
- Azure Audit Capabilities vs. „Windows Event Viewer“
- No additional license costs
- Single Control Plane for servers incl. Azure Policies to replace GPOs

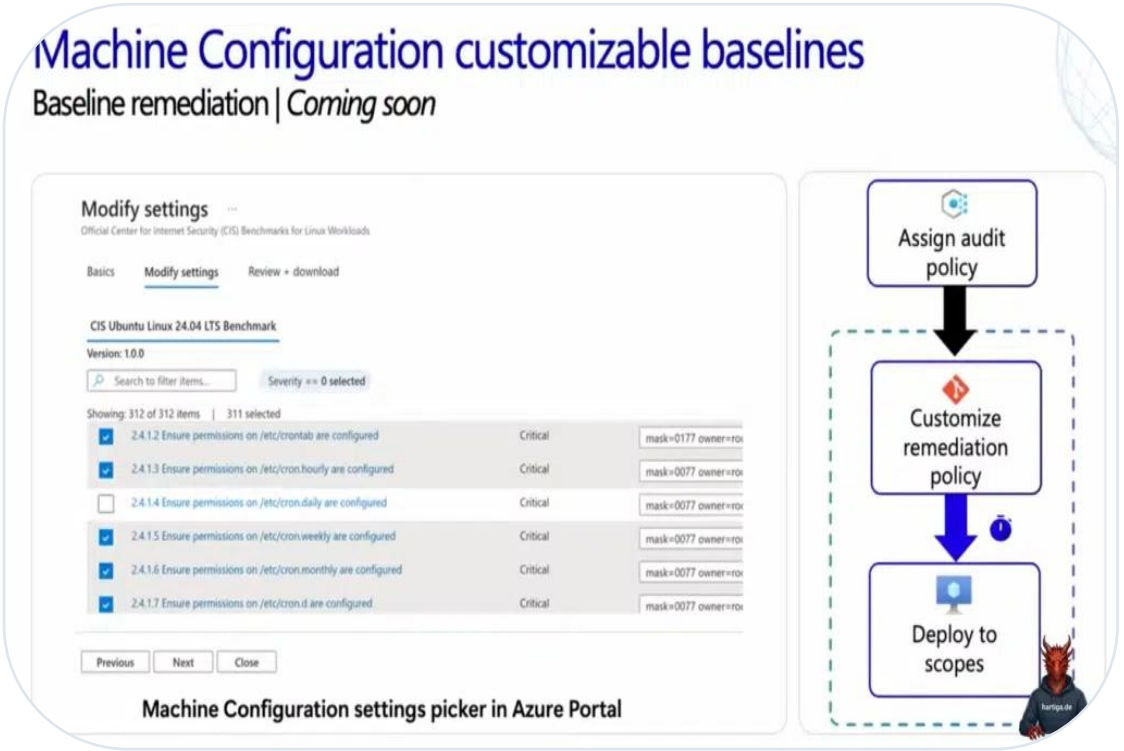

[Sign in to an Azure Arc-enabled server using Microsoft Entra ID and Azure Roles Based Access Control]

Demo - Sign in using Entra ID

Neuigkeiten für Server Management - Baselines

Für Security- und Identity-Themen

Single Control Plane

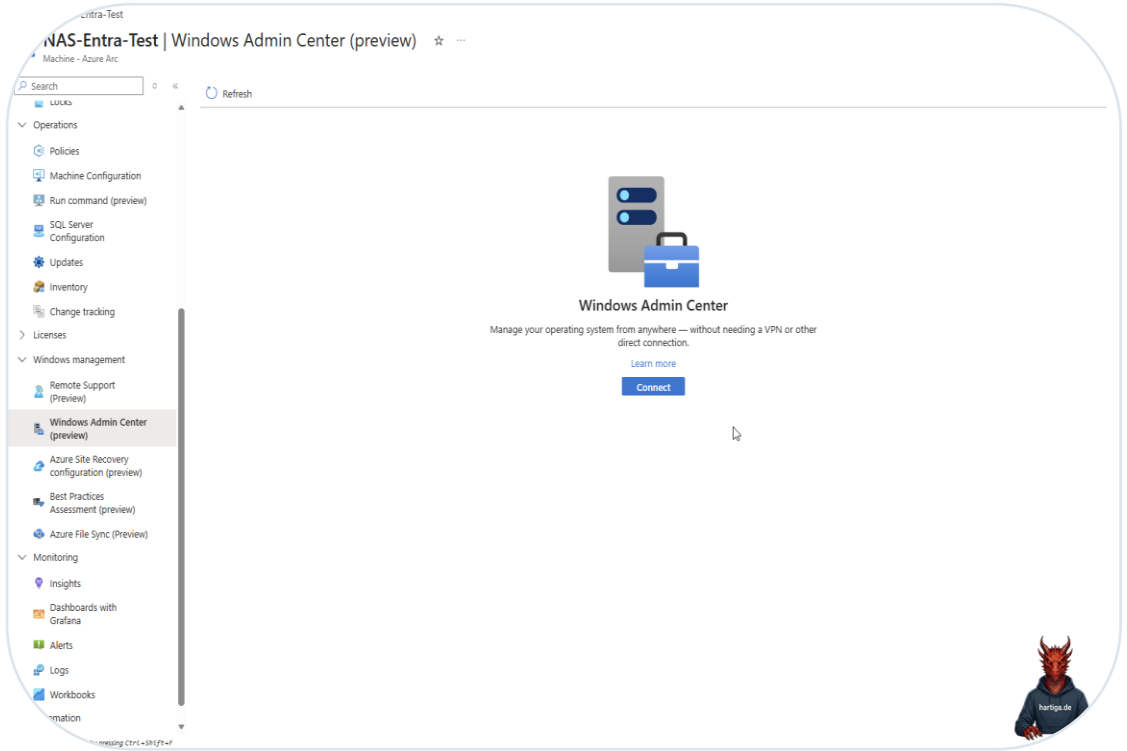

- Der zukünftige GPO Ersatz
- Customizing ist aktuell noch “schwierig”
- One place für die Richtlinien “to rule them all”
- Configurable Baselines sind heute schon ein Security Thema incl. Drift Detection

- **Free** Hotpatching (finally)

Windows Server Summit 2026 - **Evolving server management: priorities, roadmap, and tooling**

Windows Admin Center in Azure

Für Security- und Identity-Themen

Single Control Plane

- Der zukünftige Ersatz für MMCs
- Als vWAC der Ersatz für
- Noch in Preview (schon länger)
- Integration mit PAM & PIM / Entra ID

- **Free** Hotpatching (finally)

Windows Server Summit 2026 - **Evolving server management: priorities, roadmap, and tooling**

Windows Servers - Vision

Für Security- und Identity-Themen

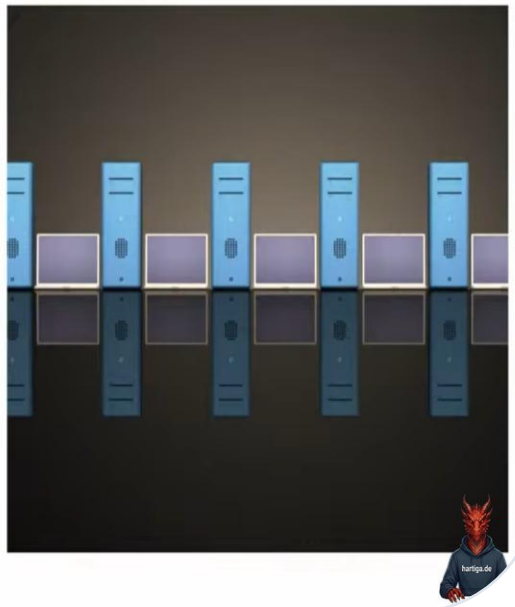

VISION: Servers as Managed Compute

Unified Management Plane
Windows Server machines are managed uniformly across Azure, on-premises, and hosted environments for seamless operations.

Consistent Policy Enforcement
Identity-based access control and policy-driven configuration apply consistently across all compute resources.

Centralized Update Orchestration
Updates and configurations are centrally orchestrated regardless of where workloads physically reside.

Flexible Operational Governance
Governance is independent of execution environment, enabling standardization with placement flexibility.

Unified Control Plane

- Eine Management Oberfläche für on Prem und Azure VMs
- Ein durchgängiges Richtlinien Management und Reporting
- Zentrales Update Management
- Essential Machine Management (preview)

Using Essential Machine Management, you can quickly onboard machines to multiple Azure management capabilities, including:

- **Monitoring insights and recommended alerts** for machine health and performance
- **Azure Update Manager** to help keep machines secure and compliant
- **Change tracking and inventory** for visibility and auditability
- **Machine configuration** for managing in-machine configuration, compliance and security
- **Azure Security baseline policy** is a set of tailored rules to assess your machine's security posture

These services help keep your infrastructure secure and healthy.

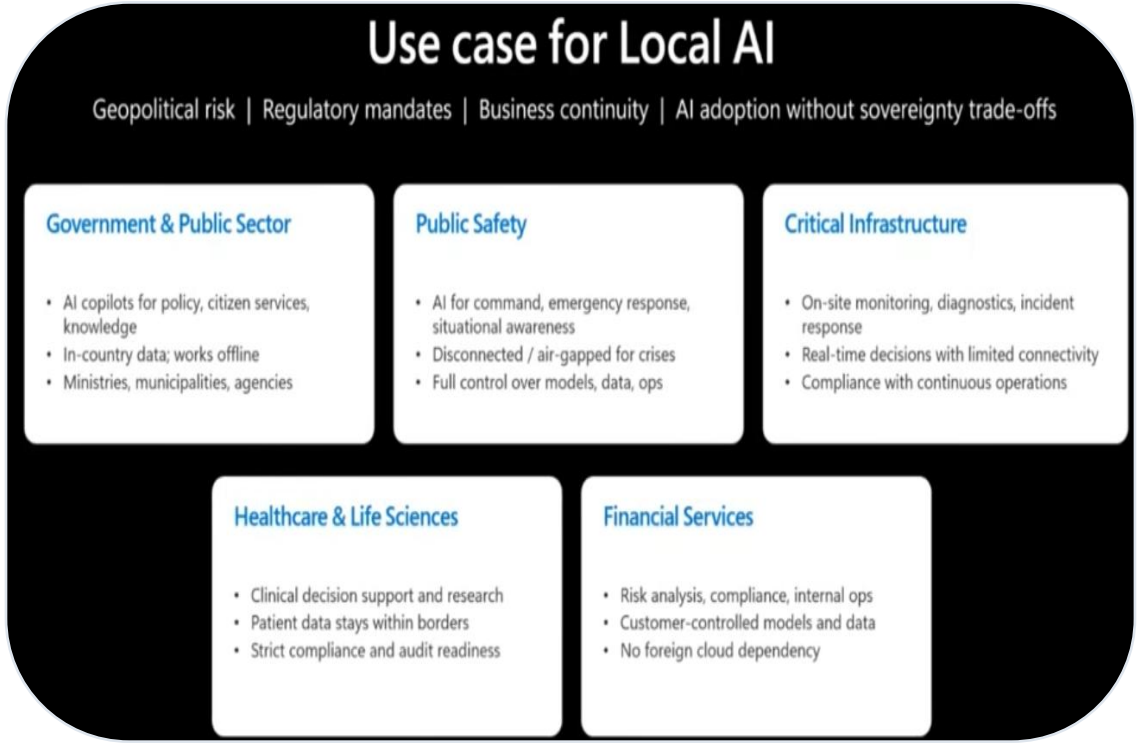

Windows Server Summit 2026 - **Evolving server management: priorities, roadmap, and tooling**

Neuigkeiten von Microsoft Build – Azure Foundry

Für Updates, Demos oder Architekturthemen

Current Updates

- Azure Foundry ist on premise und auch im Disconnected Portfolio angekommen
- Mehr Support für Local AI mit Azure Foundry auf Azure Local (Enterprise) und Windows Server 2025 (Single Node)
- Models-as-a-Platform (MaaP) and Models-as-a-Service (MaaS) announcement
- GitHub Enterprise Local: Now available in public preview
- Watch the session here: https://build.microsoft.com/en-US/sessions/OD839

Azure Infra & Entra ID – aus dem Süden, für den Süden.

Werde Teil der am schnellsten wachsenden Azure Community in Süddeutschland.

Fragen & Diskussion

Vielen Dank für eure Teilnahme am Meetup!
